

Ben's Stud Contract

Stud Services Agreement

Registered Name	Nova 3 Benelli "Ben"
Birth Date	October 10, 2019
Origin	Gober Goldens, Gober, TX
AKC Number	SS503657806
Sire	"Garrick" — Gober Golden Garrick of Nampara
Dam	"Anna" — Gober Golden Anna Maria Beach

Description

Embark results: 100% clear of all known Golden Retriever genetic conditions.

Coat: Carried the "TT" gene, which Embark identifies as the non-to-light shedding coat gene. Coat is fine, silky, with red undercoat and red fringe.

Head: Blocky head.

Pedigree: No hip dysplasia documented in the past three known generations.

Contract

Fee. Total fee is the price of the first puppy sold. This varies by owner, locale, and paperwork of the dam. The remaining littermates will be sold at this price or less.

Deposit. \$500, due at first tie. The money will be held in escrow, not deposited or cashed, until pregnancy is confirmed.

The deposit will be subtracted from the total price of the fee. One puppy is considered a litter.

Exceptions

- If the ties do not result in pregnancy, the deposit will be returned.
- If the pregnancy results in four or fewer puppies, the final stud fee will be halved.
- If the pregnancy results in 11 or more puppies, the stud fee is the original fee, plus \$250 per puppy. This applies to all surviving/living puppies.

Requirements

- Females (dam) must be brucellosis tested if the female has been previously bred. This sexually transmitted bacterial infection can affect both parents, causing infertility and abortions/stillbirths of the puppies.
- Dam must be up-to-date with vaccinations, with no exceptions. Dam must be of sound and stable temperament, of breeding quality, and be groomed and bathed before she is brought to be bred. The dam must not be exposed to any stud dog prior to breeding.

Registration

Balance of the stud fee is due before the puppies are registered with the AKC. If the balance is not paid, the sire registration will not be completed by the stud dog owner for the litter's registration.

PANHANDLE GOLDENS

Ben's Stud Contract

Care & Breeding Terms

- Females will be adequately cared for while under the care of the sire, if the dam is left with the sire. There will only be one guest dam at a time at the stud's home. The dam will be properly confined, as agreed, and cared for by Panhandle Goldens if the dam is left with the sire.
- If no pregnancy results, the dam has the option to repeat the process one time. If no pregnancy results the second time, this contract is terminated. The dam's owner must notify the stud owner of the failure of pregnancy in writing within 70 days of the observed first tie.
- The dam's owner agrees to not knowingly sell or transfer puppies whelped as a result of this mating to any person or firm connected with the business of resale or wholesale of dogs. Nor will the bitch owner transfer ownership of any puppy to any person or organization whose intent is to resell, trade, or give away the puppy or use it in any laboratory experiments.
- The dam's owner agrees to pay all expenses incurred for the purpose of the breeding at the time in which they are incurred, including, but not limited to, transportation of the dam, all veterinary costs, artificial insemination costs, semen collection (fresh, chilled, or frozen), and shipping of the same, as applicable; provided that the stud dog owner shall pay for collection/AI (artificial insemination) in the case of a natural breeding where the stud dog cannot breed the bitch.
- There is no stud dog owner liability for disease or injury. The stud dog owner shall not bear any responsibility for any disease contracted by the bitch or injury resulting to the bitch that is not a direct result of the breeding, provided that the stud dog owner has taken reasonable care of the bitch and has not acted with gross negligence.

Emergency Care

If the dam is in the care of the stud dog owner, the dam owner hereby grants the stud dog owner permission to authorize veterinary services for the dam in the event of an emergency, or if the breeding dog's health or continued health appears to be in jeopardy. The stud dog owner reserves the right to use discretion in seeking such services and agrees to notify the dam owner as soon as possible if such services become necessary. The dam owner shall be responsible for and promptly pay all veterinary costs incurred.

In Vitro Fertilization / Artificial Insemination

Separate contract for shipped or frozen semen.

Confidentiality of Disputes

The dam owner and stud dog owner agree that, in the event of a dispute between them, neither will publish or communicate the existence of the conflict or dispute in any media or forum, including social media, provided that this provision shall not prevent either party from bringing legal action or engaging in confidential mediation.
